Curriculum Vitæ of Jérémy Rouot

Date and place of birth:	7th March 1990 in Langres (Haute-Marne, France)
Nationality:	French
Marital status:	Single
Phone number:	+33 6 70 15 93 77
Mail address:	LAAS-CNRS, 7 Avenue du Colonel Roche, 31 077 Toulouse Cedex 4
Email address:	jeremy.rouot@grenoble-inp.org
Personal page:	`http://jeremyrouot.github.io/homepage/`
Research areas:	Optimization, Geometric control, Optimal control and sub-Riemannian geometry, Fracture mechanics.
Applications:	Orbital transfer with low thrust, Swimming at low Reynolds number, Magnetic Resonance Imaging, Biomechanics.

1 Affiliations

Sep. 2017 -	**Teacher and Researcher in Applied Mathematics** at EPF:École d'Ingénieur(e)s, Troyes, France.
Dec. 2016 - Aug. 2017	**Postdoctoral researcher in Applied Mathematics.** Methods and Algorithms for Control, Laboratory for Analysis and Architecture of Systems (LAAS), Toulouse, France.

2 Education and Diplomas

2010 - 2013 **Ingénieur ENSIMAG**, Applied Mathematics and Computer Science, **Grenoble Institute of Technology**, Grenoble, France.

2013 - 2016 **PhD in Applied Mathematics**, Université Côte d'Azur, INRIA Sophia Antipolis.

Title: Geometric and numerical methods in optimal control and applications to the swimming problem at low Reynolds number and to low thrust orbital transfer

Keywords: sub-Riemannian geometry ; Periodic optimal control ; Necessary and sufficient optimality conditions ; Copepod and Purcell swimmers; Orbital transfer with low thrust ; Averaging in optimal control.

Advisors: Bernard Bonnard (University of Burgundy, Dijon)
Jean-Baptiste Pomet (INRIA, Sophia Antipolis)

Defense date: 28th November 2016

File: `http://tel.archives-ouvertes.fr/tel-01472370v2`

Jury:

U. Boscain	DR, CNRS, École Polytechnique	Reviewer
E. Trélat	PR, Univ. Paris VI	Reviewer
B. Bonnard	PR, Univ. Bourgogne	Advisor
J.-B. Pomet	DR, INRIA Sophia Antipolis	Advisor
F. Alouges	PR, École Polytechnique	Examiner
P. Bettiol	PR, Univ. Bretagne Occidentale	Examiner
R. Epenoy	Ingénieur CNES Toulouse	Examiner
M. Tucsnak	PR, Univ. Bordeaux	Examiner

3 Some scientific formations

2016	Course on **Geometric optimal control and applications.**, École Doctorale Carnot-Pasteur, Dijon.
2015	Course on **Geometric optimal control**, École Doctorale Carnot-Pasteur, Dijon.
2014, Nov.	Workshop on **New trends in Calculus of variations, Geometric control and related fields**, RICAM, Linz, Austria (November 17-21).
2014, Sep. to Dec.	Trimester at Institut Henri Poincaré (Paris), **Geometry, Analysis and Dynamics on Sub-Riemannian Manifolds**. Courses: *Geodesics in sub-Riemannian manifolds* (24h), *Singularities and local geometry of vector distributions* (24h). Workshops: *Geometric analysis on sub-Riemannian manifolds, September 29-October 28* and *Nonholonomic mechanics and optimal control (November, 25th to 28th).*
2014, Mars	Course on **Polynomial optimization and control**, organized by GdR MOA, Insa Rennes, France (24-25 Mars).
2014	Course on **Resolution of algebraic systems using Gröbner's basis**, École Doctorale Carnot-Pasteur, Dijon.
2013 Nov.	Conference on **Geometry and Algebra of Linear Matrix Inequalities**, GeoLMI at CIRM, Marseille, France (November 12-16).

4 Research activities

Oral communications in international conferences.

2017, 25-28th Sep.	Conference, **18th French - German - Italian Conference on Optimization**, Paderborn, Germany. *Averaging for minimum time control problems and applications.*
2017, July	Conference, **New Horizons in Optimal Control**, Porto, Portugal. *Sub-Riemannian geometry and swimming at low Reynolds number.*
2017, July	Conference, **IFAC 2017 World Congress**, Toulouse, France. *Optimal control theory and the efficiency of the swimming mechanism of the Copepod Zooplankton.*
2016, Dec.	Conference, **55th IEEE Conference on Decision and Control**, Las Vegas, USA. *Optimal Control of an ensemble of Bloch equations with Applications in MRI.*
2016, Dec.	Conference, **55th IEEE Conference on Decision and Control**, Las Vegas, USA. *Geometric and numerical approach to the optimal control and efficiency of the Copepod swimmer*
2016, Jan.	Conference, **10th International Young Researcher Workshop on Geometry**, Mechanics and Control, Institut Henri Poincaré, Paris, France. *Geometric and numerical analysis between the Purcell swimmer and the Copepod swimmer*
2015, Aug.	Conference, **Nonlinear Control and Geometry**, Stefan Banach Center, Bedlewo, Poland. *Averaging techniques in the time minimal transfer using low propulsion*

Oral communications in national conferences.

2017, Juin — Congrès **SMAI 2017** - 8e Biennale Française des Mathématiques Appliquées et Industrielles, Ronce-les-Bains, France.
Géométrie sous-Riemannienne et nage à faible nombre de Reynolds.

2016, Mar. — Conference **SMAI-MODE 2016** - Société de Mathématiques Appliquées Industrielles, ENSEEIHT, Toulouse.
Contrôle optimal géométrique pour les micro-organismes.

Seminars.

2017, Mar. — Team's seminar, Methods and Algorithms for Control, LAAS-CNRS, Toulouse, France.
Local controllability and application to low thrust orbital transfer.

2016, Sep. — Teams' Meeting, INRIA McTAO - INRIA Mokaplan, INRIA-Paris, Paris, France.
Geometric and numerical optimal control for microorganisms at low Reynolds number.

2015, Dec. — Students seminar, Institut de Recherche Mathématique Avancée de Strasbourg, Strasbourg, France.
Nilpotent approximation in Sub-Riemannian geometry and applications to the Purcell swimmer.

2015, Oct. — Students seminar, Mathematisches Institut - Universität Basel, Basel, Switzerland.
Nilpotent approximation in Sub-Riemannian geometry and applications to the Purcell swimmer.

2015, May — 16th Yearly meeting of the doctoral school Carnot-Pasteur, Université de Bourgogne Franche-Comté, Dijon.
Averaging in optimal control and application to orbital transfer with low thrust.

2014, Dec. — Students seminar, Institut de Mathématiques de Bourgogne, Dijon.
Effect of the lunar perturbation on the metric associated with the average orbital transfer problem.

2014, May. — Students seminar, Institut de Mathématiques de Bourgogne, Dijon.
Lunar perturbation and the three-body problem.

5 Collective responsibilities

- Organizer of the student seminar of the doctoral school Carnot Pasteur, Institut Mathématiques de Bourgogne, 2015-2016.
- Reviews for "55th IEEE Conference on Decision and Control" and "20th IFAC 2017 World Congress, Toulouse, France".
- Presenter for "Fêtes de la science" in Dijon, *La Lumière,* with members of Institut Mathématiques de Bourgogne (2015 Oct.)
- Public open house of Université de Bourgogne, *Minimal surfaces and soap bubbles*, Dijon, Jan. 2014 and 2015.

6 Teaching

- Teaching Assistant - **Algebra, 64h** for 1st year students in Computer Science and

Mathematics. *Université de Bourgogne, Dijon, 2015-2016.*

- Teaching Assistant - **Partial differential equations** for 4th year students of engineer school INP ENSEEIHT, Toulouse, 2016-2017.
- Teaching Assistant - **Optimal control and application to low thrust orbital transfer** for 4th year students of engineer school INP ENSEEIHT, Toulouse, 2016-2017.
- Teaching mathematics at *EPF:École Ingénieur(e)s, Troyes, 2017-2018* for first and third year students, Volume: 300h.
